UMAIR SIDDIQUE

ANDROID DEVELOPER INTERNEE

OBJECTIVES

I have 8 months of hands-on experience working as a mobile app developer I can develop front-end layouts and backend through java and kotlin on android studio. Recently I have developed marketplace app, news app, music player app, currency converter etc . I have eager to learn new things and contribute to the team. I can build custom UI using View, View group, Grid view, and recycler view and can add functionality to them using JAVA and Kotlin

PROJECTS

News Application

I have developed a new app mobile application that fetches data from newsApi.com which display the news and images on recycler view also I have added a category section in it which shows the news according to the users choice.

Download APK File:
